SUMMARY

Junior software developer with an AI-augmented workflow: spec, generate, test, audit – the architecture decisions are mine. Six public repositories back every line of this CV, from a custom binary-format parser to a server-authoritative multiplayer game. Recently completed a Creative & AI vocational program, running production video and localization pipelines at Labelbike.

6 public repositories · ~30k LOC · 2.6k test lines · 9 ADR

EXPERIENCE

Labelbike – Creative & AI Content

Oct 2025 – Jun 2026

Formally a curricular internship (IFTS program); operationally I ran the pipeline with real delegation.

- Ran the creative/social content pipeline with real delegation, not shadowing.
- Produced and published 6 YouTube videos end-to-end (script, edit, AI-assisted production).
- Localized content into 9 languages via an AI-agent pipeline.
- Supported internal development work in Java, C++, SQL.

Optima – Business Sales Consultant

May 2024 – Jul 2025

Commercial role – sales and client relations, not software development.

- Sold telecom/utility services to business and private clients (freelance).
- Managed a client portfolio autonomously – prospecting, negotiation, retention.

EDUCATION

Technical diploma, Computer Science (Perito Informatico)

Jul 2025

Istituto Superiore Statale S. D'Arzo

IFTS Creative & AI – vocational program, concluded

Oct 2025 – Jun 2026

50% coursework + 50% on-the-job at Labelbike

SELECTED PROJECTS

PROJECT	STACK	EVIDENCE	STATUS
eu4-assistant github.com/AronneZanichelli/eu4-assistant	Python, PyQt6, CV	Custom recursive-descent parser for a proprietary binary format · ~4.2k LOC · 2.6k test lines (0.62 ratio) · multi-version CI · PyInstaller packaging	Alpha, active
BleaBox github.com/AronneZanichelli/BleaBox	Luau - -!strict, Roblox	Server-authoritative anti-exploit architecture · data-driven registry · 9 ADRs · ~8.7k lines	Active
claude-dashboard github.com/AronneZanichelli/claude-dashboard	Electron 33, React 19, TS 5.7	Desktop cockpit for Claude Code (Windows+WSL2) · 15MB JSONL streaming with virtualization · ~10.4k LOC · self-critical STRATEGIC_REVIEW included	Paused, known bug in progress
VOXELGEN github.com/AronneZanichelli/VOXELGEN	Godot 4, C#	Realtime deformable voxel engine · Marching Cubes/Transvoxel · producer/consumer threading · -65% regen time (measured)	Paused, resume planned
